

*Now you
can give more*

**Introducing a superior
balance of strength & beauty**

3M™ Lava™ Esthetic

Discover the natural-looking aesthetics of the NEW Lava™ Esthetic Zirconia, with 800 MPa of strength and 40% translucency, giving you the best of both worlds. Easy cementation with 3M™ RelyX™ Unicem 2 Self-Adhesive Resin Cement, combines high bond strength with simple handling.

Shaping smiles together

3M™ Lava™ Esthetic

Utilising the most innovative 3M™ cubic zirconia technology, Precision are able to offer you the first zirconia with inherent, toothlike fluorescence, at a high strength of 800 MPa, 5 Star Aesthetic Rating and a 5 Year Warranty.

800 MPa
of Strength

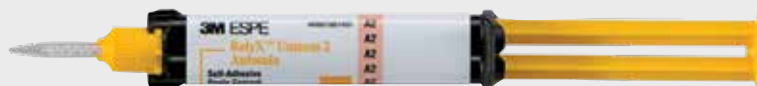

40%
Translucency

The NEW Lava™ Esthetic features a unique, new shading formulation, pre-shaded with built-in colour gradient. The sintering step reveals the beauty of the high translucency, inherent fluorescence and natural aesthetics. All of these benefits, whilst remaining stronger than glass ceramics.

To offer your patients the best of both worlds, give Precision a call today.

**INTRODUCTORY
OFFER!**

* Limit of one RelyX Unicem 2 Self-Adhesive Cement sample kit per dentist to be provided with the restoration, only while supplies last.

Request a Lava™ Esthetic Zirconia restoration from Precision today and receive your BONUS RelyX Unicem 2 Self-Adhesive Resin Cement sample kit*
